PROFESSIONAL EXPERIENCE

Software Engineer

July 2023 – Present

Incedo Inc.

Boston, MA

- Engineered robust user access controls using **Java, Spring Boot, and React.js** on an enterprise-level change management platform serving **150K+** users, reducing unauthorized access by **75%**.
- Optimized backend microservices response time from 40s to 2s (**95%** improvement) and modernized the frontend testing suite with **React Testing Library**, achieving over **90%** code coverage.
- Built an **Agentic AI Workflow** with **Gemini APIs** using tool-calling (**API, SQL, analysis, evaluator**) to query enterprise data, summarize events, and integrated into **Spring Boot microservices**.
- Developed a **Root-Cause Analysis agent** integrated with a troubleshooting agent to automatically identify, diagnose, and create change tickets, reducing incident resolution time by **50%**.
- Trained a **forecasting model** using **XGBoost**, enabling accurate prediction and reducing variance by **30%**.

Product Manager - AI Solutions

April 2025 – Present

Incedo Inc. (BrainSpark & Lighthouse)

Boston, MA

- Shaped **AI product strategy** with the Chief Solutions Officer, aligning technical and business priorities.
- Led **client discovery workshops and demos**, capturing feedback that directly influenced solution design.
- Coordinated with **engineering, data science, and design teams** to refine solution features, improve scalability, and ensure delivery of AI products that met enterprise standards.

Intern

January 2021 – March 2021

KPMG

Kuwait

- Built **Angular components** to improve frontend performance and user experience, reducing load time by **25%**.
- Developed backend services in **Java and Node.js**, integrating with REST APIs to streamline data flows and accelerate project delivery by **20%**.
- Enhanced application security by implementing **input validation** and strengthening compliance with **OWASP**.

PROJECTS

Ecommerce Inventory Management System | *Java, Spring Boot, React.js, MySQL, AWS EC2/RDS, Docker, Git*

- Built a full-stack web application with a responsive user interface (using **Material UI** components with **React.js**) for **5** stakeholders, that enhanced supply chain pipeline and improved business expenditure.
- Engineered a scalable **MySQL schema** and integrated it with **Spring Boot + Hibernate ORM** services, powering real-time updates and analytics in the UI dashboard.

Deep Research Agentic System | *Python, LangGraph, Ollama(LLaMA-3-8B), PGVector, Fast APIs, Git*

- Developed a team of **collaborating AI Agents** capable of carrying out extensive research tasks across heterogeneous sources, integrating **retrieval, analysis, and summarization** pipelines.
- Implemented tool-calling workflows with **LangGraph** to coordinate multiple agents, yielding **comprehensive, source-grounded reports** that reduced manual research time by **70%**.

Advanced Search Engine Optimizer | *C++, CMake, Ubuntu (Linux), TinyXML*

- Designed and implemented a search engine on **Linux**, optimizing token filtration and data retrieval efficiency using **Binary Search Trees (BSTs)** and **AVL Trees**, resulting in an increase in search accuracy.
- Developed and integrated **8** search algorithms, significantly improving search performance and reducing query processing time for an **XML** based dataset of over **10,000** records through web crawling and inverted indexing.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, Go, HTML/CSS

Web & Databases: Spring Boot, React.js, Node.js, Angular, GraphQL, Postgres, MySQL, MongoDB, Hibernate ORM

AI/ML & LLMs: XGBoost, LangGraph/CrewAI, Ollama, OpenAI/Gemini APIs, ChromaDB, FAISS, RAG

Developer Tools: Git, Docker, Jenkins, Maven, Gradle, AWS, Jira, Splunk, Elasticsearch

EDUCATION

University of Illinois at Chicago

Bachelor of Science in Computer Science, Minor in Mathematics

Chicago, IL, USA

August 2019 – May 2023
